SRI P. A. PAWASHE — What was the quantity of sugarcane in metric tonnes that was crushed during the last crushing season?

† SRI S. M. KRISHNA.—About 2,30,000 M. tonnes.

SRI P. A. PAWASHE — Is it a fact that last year some Agriculturists have made a representation to the effect that the sugar factory was not in a position to lift all the sugarcane allotted to it with the result they had to approach some other factories. May I also know whether the Government is aware that the factory was not in a position to press all the sugarcane allotted to it? What steps the Government are going to take to safeguard the interests of cane growers?

SRI S. M. KRISHNA — The Government has a policy to earmark certain areas for each sugar factory and this has been done on the basis of experience gained by the previous year, crushing operations of every sugar factory. Last year, this factory has crushed over about 2 lakhs tonnes of sugarcane and in the meanwhile there were some problems; due to certain labour situations, the factory was closed for 15 days. That might have been the reason for certain inconvenience that could possibly have been caused for the sugarcane growers but these are some of the situations which can be taken care of and I don't see any reason why Government should take an alarmistic view of the situation.

SRI N. B. SIRDESAI— May I know the area under sugarcane allotted to Sanjivini Sugar Factory, Goa, Somaiah Sugar Factory, Somarwadi and some other sugar factories in a number of villages in Belgaum District and in Khanapur, Belgaum, Haliyal and Dharwar Talukas and the quantity of sugarcane utilised for preparing jaggery by the growers ?

SRI S. M. KRISHNA— The question pertains only to the Malaprabha Co-operative Sugar Factory. If the hon. Member wants details about the areas which have been reserved for Somaiah Sugar Factory, and various other factories, he is advised to put a separate question.

SRI N.B. SIRDESAI— Some areas under sugarcane cultivation had been allotted to various sugar factories also. That is why, I put that question.

SRI S. M. KRISHNA— I can give the details regarding this sugar factory only I can give the total acreage under sugarcane cultivation reserved for this factory in Belgaum, Bailhongal and Khanapur which forms part of the Belgaum.

Belgaum	3,690 Acres
Bailhongal	4,880 Acres
Khanapur	5,845 Acres
Parasgad	230 Acres

The total acreage reserved for sugarcane cultivation comes to 16,000 acres.

SRI N. B. SIRDESAI—In Khanapur Taluka, there is a surplus area under sugarcane cultivation.

SRI S. M. KRISHNA— I want notice to answer this question.

SRI P. A. PAWSHE— Has it come to the notice of the Government that this factory is not in a position to crush all the sugarcane reserved for it and whether the Government is prepared to permit the growers to take their sugarcane to some other factories which are nearby?

SRI S. M. KRISHNA— If the hon. Member makes out a convincing case that this sugar factory is not in position to crush all the sugar cane reserved for it, certainly the Government will step in to see that the sugarcane growers are not exposed to risk.
